

TRADING HUB

Occupational Areas: Financial Analytics, Banking & Investment, Technology, Data, Computer Science

Salary range: Competitive

Location: London (EC2) (closest station: Liverpool Street)

Role: Graduate Analyst

About TradingHub:

TradingHub is a rapidly expanding Financial Services Technology (FinTech) company. Recently the firm was given an award in recognition for our contribution to trade and investment by the Department for International Trade and the UK Board of Trade.

We build cutting edge, AI-assisted, trade analysis software for our clients which consist of banks, hedge funds, asset managers, and other financial services institutions. Our products are used by these organisations to detect financial crime and enhance business performance based on client's day to day trading data. These products include:

- Best execution analysis
- Trader performance profiling and enhancement
- Insider trading and market abuse detection
- Rogue trader detection

Our products are market leading in each category:

- Advanced analytics and machine learning algorithms allow us to perform statistically rigorous analysis on all asset classes in a unique way.
- We use in-house programming languages, optimised for fast and complex analysis of large trade volumes.
- All our tools have an intuitive user interface (built using in-house programming languages) that make it very easy for our clients to access our analysis.

We view ourselves as a disruptive FinTech company that is nimble enough to move fast, innovate quickly and provide a premium level of client service and support.

Initial training will involve bringing you up to speed on our products, teaching you our internal programming language, and making sure that you have all other necessary technical expertise. However, we take a "learn by doing" approach where, as soon as possible, you will be assigned real tasks and adding value to the company.

Every day is different but previous graduates have been flown to Hong Kong and New York to meet with clients, built powerful internal management tools, tackled sophisticated mathematical challenges involved with extrapolating results from incomplete data, have been involved in the initial analytical design of new products and a myriad of other fascinating projects.

This is an incredibly exciting time to be part of TradingHub. In the past year we have doubled in size and will shortly move to a brand new larger office, with increasing interest in our products from all over the financial world, this is the perfect time to get involved.

Graduate Analyst:

The role is ideal for STEM finalists and recent graduates who want to be at the forefront of an incredibly exciting industry.

Role Description

This is a brand new role within a growing team of client-facing technical analysts.

The Technical Solutions team has a deep understanding of the tool analytics and links the development team, the client operations team and its clients. Members of the team provide support to the firm's clients with a key focus on execution and delivery in line with internal Service Level Agreements to provide "best in class" client service. The successful applicant will have excellent mathematical skills with a patient attitude to problem solving and the ability to clearly explain complex issues and solutions to clients is. The role will attract applicants who are able to apply a strong mathematical and analytical skill set coupled with excellent interpersonal and oral/written communication skills.

In addition successful applicants will be able to demonstrate creativity around solutions to create greater efficiency within the day to day processes.

How to Apply
