

TRADING HUB

Graduate Analyst

Occupational Areas: Financial Analytics, Banking & Investment, Technology, Data, Computer Science

Salary range: Competitive

Location: London (EC2 – Next to Liverpool Street Station)

Department: Onboarding Team

Reports to: Head of CRM & Client Onboarding

About TradingHub:

TradingHub is a rapidly expanding Financial Services Technology (FinTech) company based in amazing offices within Broadgate Tower (EC2). Recently the firm was given an award in recognition for our contribution to trade and investment by the Department for International Trade and the UK Board of Trade.

We build cutting edge, AI assisted, trade analysis software for our clients which consist of banks, hedge funds, asset managers, and other financial services institutions. Our products are used by these organisations to detect financial crime and enhance business performance based on client's day to day trading data.

These products include:

- Best execution analysis
- Trader performance profiling and enhancement
- Insider trading and market abuse detection
- Rogue trader detection

Our products are market leading in each category

- Advanced analytics and machine learning algorithms allow us to perform statistically rigorous analysis on all asset classes in a unique way.
- We use in house programming languages, optimised for fast and complex analysis of large trade volumes.
- All our tools have an intuitive user interface (built using in house programming languages) that make it very easy for our clients to access our analysis.

We view ourselves as a disruptive FinTech company that is nimble enough to move fast, innovate quickly and provide a premium level of client service and support.

Role Description and Purpose

A key aspect to this role is to manage ongoing/new relationships with clients, who range from Banks, Asset Managers, Hedge Funds and other trading institutions, and successfully onboard them to applicable system.

You would be joining a forward thinking and supportive Client Onboarding team and be responsible for:

- All stages of client engagement and implementation of our analytics products: <https://www2.tradinghub.com/> (for further information on our products)
- Analysing and interpreting large volumes of client trade data in a controlled and insightful manner
- Leading large, complex data & analytics projects
- Be the first point of contact to solve key client issues
- Learning TradingHub's bespoke development language
- Providing significant input and working very closely with development teams and other departments within TradingHub to assist with innovation and company/product development

Why is this role exciting?

Our Trade Data Analytics products have a global impact and are way ahead of competitors within the FinTech space, so you would be a key contributor the maintaining that success, using your technical ability and communication skills to building lasting relationships with senior stakeholders in tier 1 banks, asset managers etc.

We develop everything in-house, so we truly own our own success. You would be supported by the teams around you and be given on the job training on our systems. Furthermore, we work in an open-plan office so you would sit in the midst of everything and be fully immersed in our culture. We are a technology company so push to get the best out of our technology, and we look for our employees to identify, scope and develop automation opportunities in their daily tasks.

Essential Qualifications & Experience

- Degree-qualified
- Programming-related knowledge and experience (VBA or SQL would be beneficial but not essential)
- Financial / mathematical qualifications are advantageous (or at least some interest in Trading/Financial markets)
- Logical and analytical approach
- Excellent written and verbal communication skills
- Driven and eager to achieve results
- Able to communicate effectively to key stakeholders at all levels
- Able to break down complex technical problem into simpler terms
