

TRADING HUB

INFORMATION SECURITY ANALYST

Occupational Areas: Financial Analytics, Banking & Investment, Technology, Data, Computer Science

Salary range: Competitive

Location: London (EC2) (closest station: Liverpool Street)

About TradingHub:

TradingHub is a rapidly expanding Financial Services Technology (FinTech) company. Recently the firm was given an award in recognition for our contribution to trade and investment by the Department for International Trade and the UK Board of Trade.

We build cutting edge, AI-assisted, trade analysis software for our clients which consist of banks, hedge funds, asset managers, and other financial services institutions. Our products are used by these organisations to detect financial crime and enhance business performance based on the client's day to day trading data. These products include:

- Best execution analysis
- Trader performance profiling and enhancement
- Insider trading and market abuse detection
- Rogue trader detection

Our products are market leading in each category:

- Advanced analytics and machine learning algorithms allow us to perform statistically rigorous analysis of all asset classes uniquely.
- We use in-house programming languages, optimised for fast and complex analysis of large trade volumes.
- All our tools have an intuitive user interface (built using in-house programming languages) that make it very easy for our clients to access our analysis.

We view ourselves as a disruptive FinTech company that is nimble enough to move fast, innovate quickly and provide a premium level of client service and support.

Summary of Role

The key remit of this individual would be working with the Head of Information Security to review, monitor and continually improve TradingHub's information security posture, covering both internal and external threats.

Responsibilities will include:

- Manage and monitor security alerts, triage findings and escalate incidents
- Work with engineering teams to help identify system weaknesses and design improvements
- Implement tooling to automate the management of information security controls and monitoring
- Develop systems to record and audit systems, assets, and their security and compliance status
- Aid in the documentation of processes and procedures for security and controls

Requirements:

- Coding experience, ideally with C#
- Security engineering experience, ideally with AWS, but otherwise windows domain hardening, PowerShell automation
- Demonstrable understanding of security fundamentals and an ability to threat model
- Good computing fundamentals, including an understanding of network, cloud, and web application security

If this is of interest to you please send a covering letter and a cv to careers@tradinghub.com.

TradingHub is committed to providing equal opportunities and supporting diversity in employment. Diverse teams are the best teams.
